

choices Benefits Program

Eligible Dependents – Over age 21 Student Verification

Please be reminded that unmarried, dependent children under the age of 21, or to age 25 and attending university or a similar educational institution on a full time basis are eligible for continued coverage under your choices Health & Dental plan. ***If your dependent child is not eligible for continued coverage as described, you must update your choices account and remove the dependent from active coverage.***

As part of the student verification process, at age 21 the 'relationship' of your dependent will be automatically changed from 'child' to 'student'. This is necessary to allow continued eligibility with the Insurer. In August of the year your dependent turns 21 and each year thereafter, you will be contacted by email and asked to provide proof of full time attendance at school. This can be satisfied by providing a copy of the tuition statement or a student timetable as long as the dependent is identified and full time attendance is verified. Full instructions will be included in the email.

If you do not provide the requested information at initial student verification or annually thereafter, your dependent will be removed from active coverage and the Insurer will not consider further health or dental claims.

At age 25, the student will no longer be eligible and removed from your plan.
